

FAQ **WHITE SPOT'S NEW BEYOND MEAT® MENU ITEMS**

WHAT IS THE BEYOND BURGER® MEAT PATTY?

The Beyond Burger® is the world's first plant-based burger patty that looks, cooks, and tastes like beef. It has all the juicy, meaty deliciousness of a traditional burger, but comes with the benefits of a plant-based meal. Each 4 oz., patty contains 20 g of 100-percent plant-based protein and is made without GMOs, soy, gluten, antibiotics or hormones.

WHAT IS THE BEYOND BURGER MEAT® PATTY MADE FROM?

The Beyond Burger is made from simple plant-based ingredients, applied in fresh ways. Peas, mung bean, and brown rice provide the protein. Trace amounts of beet and pomegranate lend a meaty red color. Coconut oil and potato starch ensure mouthwatering juiciness and chew. The result is an uncompromisingly delicious burger, made directly from plants. For more information on the patty, visit: BeyondMeat.com
